FULWOOD'S *Frost-Proof* CABBAGE PLANTS

Ready September 1st to June 15th

EARLY JERSEY WAKEFIELD

Many market gardeners consider this the very best Cabbage grown. Its merits are many, among which are medium heads, for an early variety, small outside foliage, and uniformity of crop. Heads are white, solid and tender. This variety always brings a good price because of its earliness and it is therefore a good money-maker. This is a Cabbage that makes a head in 63 days and weighs about two pounds. The head is pointed.

CHARLESTON WAKEFIELD

This Cabbage is much like the Jersey Wakefield. It has a much larger head, however, and is about ten days later. This is a desirable variety for shipping purposes as the heads are solid and firm. It is a strong favorite with growers for a main crop. A large pointed head, weighing three to four pounds and produces hard heads 73 days after plants are planted.

COPENHAGEN MARKET

A fine Cabbage. This variety is nearly as early as the Jersey Wakefield. The stem is short, has large round and solid head with few outer leaves, of an upright growth. My stock of this popular variety is extra early, uniform and dependable. A round head, weighing three to three and one-half pounds, produces headed Cabbage 70 days after plants are planted.

GOLDEN ACRE

Golden Acre is very similar to Copenhagen Market, being a few days earlier. The plants usually produce marketable heads in 65 to 70 days, which is as early as the Early Jersey Wakefield. It is a round headed variety for market gardeners and shippers.

SPECIAL NOTICE: A very critical shortage has developed in good cabbage seed. Some questionable supplies grown from stumps of shipping crops have been offered for sale and planted by some plant growers. We assure you that our cabbage seed were secured from the very best sources and are guaranteed to be the best on the market. You take no chances in using our plants.

Wilt-Resistant Varieties of Frost-Proof Cabbage Plants on back of this page.

FULWOOD'S *Genuine Frost-Proof* PLANTS

Ready September 1st to June 15th — Wilt-Resistant Varieties

MARION MARKET

This is also offered as Wisconsin Copenhagen and is a very important mid-season yellows-resistant sort of Cabbage for kraut manufacture and market. This variety has prominent globular heads which approach those of Glory of Enkhuizen in size, and it produces a heavy yield on yellows-infested soil where ordinary varieties fail. Matures heads 70 days after plants are planted. Somewhat larger head than the Copenhagen, but the same shape.

WISCONSIN ALL SEASON

This is a yellows-resistant strain developed at the Wisconsin Experiment Station by selection of healthy plants out of standard All-Season grown on infested land. Wisconsin All-Season is a very valuable, heavily productive, hard-headed variety of particular merit for use in yellows-infested localities and it is well adapted for kraut and for winter use. Makes heads in 85 days, weighing 6 to 8 pounds.

GEORGIA BLUE STEM COLLARD PLANTS

These plants are very much like the Cabbage plants. They grow from two to three feet tall, with light green, tender leaves on long stems. They withstand heat and have an excellent flavor when cooked. I have a good supply on hand the year round and can make prompt shipments at the same price as Cabbage.

CABBAGE COLLARD

Cabbage Collard is somewhat like the Georgia Blue Stem except it makes a small head somewhat like a cabbage but you crop and eat the under leaves, also as you do the Georgia Blue Stem Collard. It takes about 60 days after plants are set before collard leaves are ready to eat. Collard plants are ready and can be set during the following months, May, June, July, August and September. Northern states should not plant later than August.

Money saving postpaid plant collections will be found on next to the last page in this catalog.

Prices and Varieties of Frost-Proof Onion Plants on the back of this page.

FULWOOD'S GENUINE *Frost-Proof* ONION PLANTS

There is a very short crop of Onion seed. However, we secured seed of two good varieties, planting some three thousand pounds. In ordering, be sure to state if we can substitute another good variety if we should be out of the variety wanted. State first choice and second choice.

All seed is treated before planting and plants are sprayed during the growing period and thus you are assured of good, healthy, strong plants. Because they are grown in the open field and are subject to light frosts during the growing period, they are Genuine Frost-Proof plants and will stand temperatures as low as 18 to 20 degrees above zero without injury. Onions grown from Fulwood's Genuine Frost-Proof Onion plants are also an excellent money crop, as they can be marketed at least two weeks in advance of Onions grown from sets and way ahead of Onions grown from seed. Furthermore, my plants will make much better Onions than those grown from sets, the Onions being larger and they do not run to seed. They will also keep much better when cured and stored.

My Onion plants should be set out the same time as my Cabbage plants, and you can order them for shipment at the same time. My Onion plants are not to be confused with cheap Texas plants kept on storage. Order my fresh pulled plants for a bumper crop on Onions.

CRYSTAL WAX BERMUDA

Probably the best selling Bermuda Onion on the market because of its exceptionally attractive appearance. It has the same general appearance as the Yellow Bermuda except that it is crystal white and waxy. Because of its sweet, mild flavor, like the Yellow Bermuda, this is an excellent eating Onion.

YELLOW BERMUDA

This is the most widely grown of all Bermuda Onions. No sweeter Onion is grown than this, and it always has a ready market and is a large producer and a real money-maker. Whether grown for marketing or for your own table, you can make no mistake in ordering this variety.

FULWOOD'S TOMATO PLANTS

Ready April 1st to June 15th.

My Tomato Plants are certified by the State of Georgia. They are grown on new land from Certified seed. I grow each season four hundred acres of Tomato Plants. These plants are grown in the open field and when shipped are 8 to 10 inches tall, they are field hardened, stocky and well-rooted. Each bundle of 100 is wrapped with paper to hold the damp moss to the roots. They are then packed in special crates or hampers and shipped by express. They will keep in good condition six to ten days. These plants are not frost-proof and should not be planted until danger of frost is over. The fact that the seed are planted here in February and March gives the plants a chance to be acclimated and toughened by outside temperatures and when set further North will start growing quickly and produce rich, red, ripe Tomatoes three weeks before home grown or hot house plants. I ship these plants to every part of the United States. Have been shipping large quantities to market gardeners and truckers for thirty-four years. Van Camp Packing Co., of Indianapolis, Ind., uses ten million of my Tomato Plants every season. Send me your order for some of these fine plants; you will be more than pleased with the early profitable crop you will produce.

DESCRIPTION OF VARIETIES OF TOMATO PLANTS

GREATER BALTIMORE

is similar to the Stone, heavily productive and very valuable for canning. Fruits are scarlet-red, large, commonly weigh six ounces; deep but flat; smooth, very firm and solid.

MARGLOBE

is a splendid type for earliness and uniformity; particularly valuable for shipping; definite disease-resistance recommends this type for use in sections infested with Fusarium Wilt and Nail-head Rust. Plants thrifty and heavily productive, of long bearing period. Fruits uniform deep scarlet; large; uniformly globe shaped; smooth, solid and of distinct quality.

RUTGERS

is highly recommended as a second early maturing variety for canning and Tomato juice. Fruits are of medium to large size, similar in shape to Marglobe, but slightly more flattened.

FULWOOD'S PEPPER PLANTS

CALIFORNIA WONDER VARIETY

This is an outstanding medium large variety for market garden and shipping. Plants vigorous, prolific. Fruits 4-lobed, chunky; very attractive, smooth, uniform and deep green, changing to bright crimson; flesh thicker than any other variety, sweet and mild.

Not Frost-Proof.
Ready April 1st to June 15th.

FULWOOD'S IMPROVED PORTO RICO SWEET POTATO PLANTS

Southerners who know their Yams will appreciate this Porto Rico as the finest ever. People in the East and Middle West who know Sweet Potatoes only as being small, dry and yellow have a real treat in store for them if they will try this luscious variety. My Porto Rico always has a deep rich red meat that is especially sweet and tasty. It is two to three weeks earlier than most yams and is an enormous yielder and keeps especially well. Northern markets and curing houses pay top prices for this variety.

Not Frost-Proof. Ready April 1st to July 1st.

FULWOOD'S EGGPLANT PLANTS

Black Beauty Variety—I specialize on this one variety because it has many merits. It holds its color especially well, grows very large, has good shape and is of unusually good quality. The Black Beauty variety is naturally early, and if you will grow it from my fine plants your crop will be just that much earlier.

Not Frost-Proof.

FULWOOD'S GENUINE FROST-PROOF CABBAGE PLANTS

● Vegetables sold early in the season bring many times the price of those marketed several weeks later, Fulwood's Genuine Frost-Proof plants produce from two to three weeks before home-grown plants—and that's why they are real money-makers for the buyer.

● Here at Tifton, Georgia, where my plantation is located, the soil and climatic conditions are ideally suited for growing tough, hardy, healthy plants in the open field during the winter and early spring. The plants make a slow but steady growth and when eight or ten weeks old they are extremely tough and hardy. In this condition they can be shipped to territory farther north and be planted in the open field there a month or six weeks earlier than home-grown, hot-bed, or cold frame plants.

● These Frost-Proof plants will stand temperatures of 18 to 20 degrees above zero without injury. Freezing of the soil or covering of the plants with ice, sleet or snow after they have been planted will not injure them unless the temperature gets below 18 to 20 degrees.

● Because my plants are so strong and healthy, and because they can safely be planted considerably in advance of home-grown plants, is the reason for their being able to make large, extra early crops—all ready for market during the time prices are high.

All plants listed in this catalog are grown in the open field and will produce vegetables three weeks before your home-grown plants or hot house plants. Plant your garden with Fulwood's fine Field Grown Plants.

TESTIMONIAL LETTERS

"Despite every effort of weatherman to discourage lettuce, onion, beet, and cabbage plants, they still continue to grow excellently and wave their leaves defiantly, shouting, 'HURRAY FOR FULWOOD.'" Nichols, Yonkers, N. Y.

"I am sending for more plants this year, as I had very good luck with your plants last year. Many of the tomatoes weighed two pounds. I had ripe tomatoes in 60 days after setting out the plants. The plants were in excellent condition although some of them were in the post office over Sunday. Thanking you for such nice plants, I hope to remain your customer." Mrs. Arthur R. Carlson, Bronson, Iowa.

"Received my tomato plants. They were extra nice and I am well pleased with the shipment." Della Allard, Vergennes, Ill.

"The plants were received in good condition and I was well pleased with them." Mattie Morrison, Rentiesville, Okla.

"Tomato plants arrived in fine shape. The packing was good." Mrs. C. E. Watts, Chetopa, Kan.

"Plants received in excellent condition. Best onion plants we ever got." W. C. Mealy, Poplin, Wis.

"It may interest you to know that the two shipments of tomato and pepper plants arrived in perfect shape and were the finest plants we have ever had. Also appreciate the full count." K. F. Supnour, Ashtabula, Ohio.

"Onions arrived O. K. and are very nice. Accept my thanks and appreciation for your nice treatment." Darrell Theobald, Bloomington, Ill.

"I ordered some cabbage plants from you last spring and they were very satisfactory. We received a handsome price for them. Oldtimers say they were the finest plants ever seen here." Woodrow Allen Denton, Cosby, Tenn.

"I feel like I owe you a letter as to the tomato plants ordered. Plants received in first class condition and were the nicest I have ever seen and produced a bountiful crop." Rufus G. Matthews, Pekin, Ind.

Eggplant	Black Beauty	Frost Kills	2½'	24"	50	7,000
Pepper	California Wonder	Frost Kills	3'	24"	50	15,000

PLANTING NOTES: When plants arrive, if your ground is not in condition to plant right away, take the plants out of the crate, cut the bands, spread out and place the roots in soft mud. In planting, pack soil well around the roots, pouring water in the hole after the plants are set out. Throw loose dirt around the plants after watering to keep the wet soil from drying out. Use chart above for proper spacing.

and Jersey Wake-

\$2.00

Per 1000

CABBAGE PLANTS

hagen Market. These plants are grown from
best Ferry-Morse Seed.
PRICES, ANY QUANTITY BY EXPRESS

Varieties: Marion
Market and Copen-

\$3.00

Per 1000

ONION PLANTS

Now Ready!

Varieties: Yellow Bermuda
and Crystal Wax. (Most Onion Plants from some sections are sold
by the crate, supposed to have 6000, but when counted actually
have only around 3000). My Onion plants are tied 100 to a bunch
and sold full count by the thousand. Good
fresh plants!

PRICES, ANY QUANTITY BY EXPRESS

\$2.00

Per 1000

All prices are based on present crop prospects and subject to
change should crops be cut short. All other plants advertised in
this catalog are sold at catalog prices.

A dealer can order 1000 or more plants at the ten thousand
rate. ALL PLANTS ARE FRESH PULLED AND SHIPPED ON
SAME DAY.
